

AN-KE HUANG

Computer Science,
National Formosa University

0909-179-797 | a9403230430amos@gmail.com | Taipei / New Taipei City

PROFILE

Current Status

fourth-year CSIE Student

Career Focus

Academic-year Internship
Software / Full-Stack Engineering

Military Service

Not yet served

Availability

Available after offer

English Proficiency

TOEIC: 710; DET: 90

CORE SKILLS

- C/C++
- Python
- C#
- AI-Assisted Coding & Testing
- Git
- Flutter
- LSTM
- YOLO
- Altium
- Linux
- Java
- ARM Cortex-M

LANGUAGES

Mandarin Chinese
Native / Proficient

English
Intermediate

Japanese
Basic

Taiwanese Hokkien
Intermediate

CERTIFICATIONS

- **Level C Indoor Wiring Technician**
- **Level C Industrial Wiring Technician**
- **Class 2 Amateur Radio Operator**
- **TQC Professional Linux System Admin**
- **Red Cross First Aid Training**

PROFESSIONAL SUMMARY

Fourth-year CSIE student ranked within the top 15% of the department during the final two academic years.
Experienced in software/firmware testing, embedded systems, AI, and system integration. Currently a QA intern at Panasonic, with project experience recognized by two Bronze Awards and one Honorable Mention in national competitions.
Currently seeking internship opportunities in software engineering, QA/testing, embedded systems, AI, or related fields.

EXPERIENCE

Panasonic Toughbook — 2026/07 ~

System Test & IT Engineer Intern | New Taipei City

System Test & IT Engineer Intern at Panasonic, performing system testing and validation for rugged computers and peripheral devices, while developing and maintaining test scripts for pre-production and pre-shipment inspection.

EDUCATION

National Formosa University

B.S. in Computer Science & Information Engineering

Top 15% of the department during the final two academic years
Python Teaching Assistant
Two Bronze Awards & one Honorable Mention in project competitions
Honorable Mention in a programming competition

National Pingtung Industrial Vocational High School

Department of Electrical Engineering | Graduated

GRADUATION PROJECT

AI-Powered Smart Baby Soothing Chair

Firmware · Sensors · AI Recognition · System Integration

Integrated embedded control, sensors, circuits, AI audio recognition, and cross-platform application functions into a complete system.

TEACHING & LEADERSHIP

Python Programming | Teaching Assistant

Guided students in programming fundamentals, debugging, assignments, and problem solving.

Projects · Skills · Achievements

TECHNICAL SKILLS

Programming

C · C++ · Java · C# · Python · Algorithms
Data Processing · Debugging

AI & Data Processing

YOLO Detection / Pose Estimation
LSTM Sequence Recognition
Audio Processing · Model Training

App Development

Flutter Cross-platform Apps
Qt Desktop Applications

Embedded Systems

ARM Cortex-M
Firmware · System Integration
SPI / I2C / UART / GPIO

Tools & Environments

Keil MDK · Quartus · VS Code · GCC
Git · Linux

Hardware / EDA

Altium Designer
Circuit Design · PCB Layout
HW/SW Integration & Verification

PROJECT & COMPETITION HIGHLIGHTS

AI-Powered Smart Baby Soothing Chair

Embedded control + AI audio recognition; hardware planning, system integration, control logic, and demonstration validation

20th Holtek MCU Contest Bronze

4th Andes RISC-V Bronze

Project Competition Honorable Mention

SELECTED COURSEWORK

Course	Grade	Course	Grade	Course	Grade
Computer Programming	87	Database Systems	89	Operating Systems	91
Computer Organization	100	Network Engineering Practice	87	Programmable Logic Design Practice	87
Data Structures II	95	Information Security (Cryptography)	81	Python	88
Java Programming II	95	Algorithms	87	Systems Analysis & Design	88
Compiler Design	94	Microprocessors	88	Linux	83
